### TECHNOLOGY AND CHARACTERISTICS

DocolSensor

WaveSci

DocolEletric

Bi-nickel Chrome

### ADVANTAGES

**The Electronic Dispenser** features a modern and sophisticated design.

**It is perfect for using in kitchens or bathrooms** and its anti-blocking guarantees the same dosage each time it is activated (approximately 1 ml per cycle).

**Developed with innovative technology**, as it is equipped with timed sensor activation: the detergent or soap flow is automatically released when the hands approach the sensor detection field.

**This promotes hygiene**, as activation does not require any manual contact.

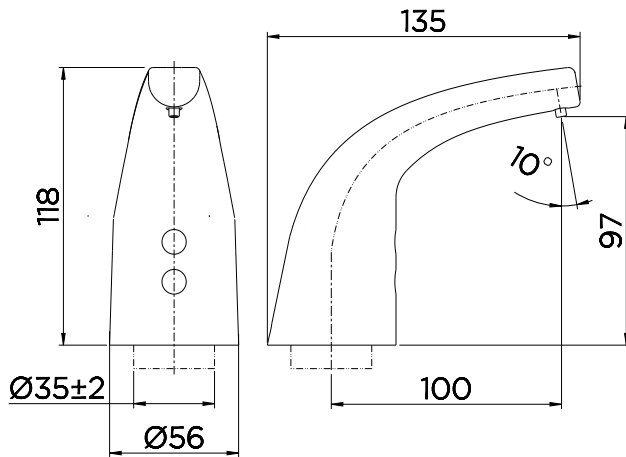

**It is equipped with the WaveSci technology**, an exclusive intelligence system which prevents activation based on variations in the luminosity of the ambient.

**Easy filling**, the reservoir coupling system is quick and practical, it holds 1 liter of liquid detergent of soap.
